

## Allied Health Introduction to Professional Supervision workshop

### Aims/Purpose:

This two day face-to-face workshop is for allied health professionals in physical health planning to become supervisors. The workshop provides an introduction to the 3DHB professional supervision policy and processes as well as tools and resources to support you to become an effective supervisor

**Pre-requisite: Supervisee eLearning (available via KoAwhateaLEARN and Connect Me).**

### Content:

- The functions and benefits of professional supervision
- How to set up supervision effectively including structure and agenda setting
- How to support workplace learners including developing reflective practice
- Supervision skills – strengths based and solution focused
- Ethics, risk, accountability and emotional wellbeing in supervision
