

Breast Surgery Study Day

Learning outcomes:

The Breast Surgery study day is aimed at guiding and supporting nurses who care for patients who have undergone Breast Surgery. It helps nurses and other health care professionals provide better education, support and care for their patients. The day includes sessions from expert speakers with many years of experience in the field.

Content can include:

- Breast screening and diagnostic services for breast cancer
- Psychosocial aspects of breast cancer
- Breast reconstruction options
- Complications following breast surgery
- Physiotherapy following breast surgery
- Post-op surgical pain management
- Post-operative nursing care following breast reconstruction surgery
- Breast reduction and augmentation
- Nipple tattooing
