

Diabetes Intro Course – Day 1 & 2

Learning outcomes:

This course will increase your confidence in delivering diabetes care. It is taught by a variety of speakers and co-ordinated by the Specialist Diabetes Nursing Service at Hutt Valley. It is relevant for nurses and allied health professionals working with people with diabetes – primary care, hospital or community based.

Content:

You will learn about all aspects of diabetes management, including Type 1, Type 2 and Gestational diabetes. The course includes both theory and practical hands on sessions.

The course runs over two days, spanning two consecutive fortnights – you must attend both days to complete your training.
