

General Surgical Nursing -Introduction

Learning outcomes:

Introduction to general surgical nursing is aimed at guiding and supporting nurses who have recently started in general surgical clinical areas. It helps nurses provide better education, support and care for their patients undergoing various general surgical procedures. It has expert speakers with many years of experience in the field.

Content:

- Anatomy and physiology of the gastrointestinal tract
- Colorectal surgery
- Stoma therapy
- Gallbladder disease
- Pancreatitis
- Nutrition in general surgery
- Physiotherapy
- May include ERAS
- May include APMS in surgical care
